Dear ones

Over a couple of years I have a thought to do something to resist Global Warming . a technology campus should start doing something in that line . so I do plan to do two things in this year

01. No plastic is entertained in the campus . No fax etc .

02. Control of Paper use . so here after some bundle of papers will be available to each department . Proper utilization is important . After the first allocation of bundles, there is no additional A4 bundle will be available in between the year . If needs that they have to manage by themselves

Let's start with these two ... more to come

God bless

Royachan
